

Know-how makes the difference

VALTOR OFFSHORE

VALTOR OFFSHORE

Valtor was founded in 1985 on a vision based on doing the job and doing it right.

In an industry where downtime can cost millions of dollars, minimising risks is a necessity. We never compromise and we never take the easy option. We find the right solution in the best quality and always in accordance with the client's requirements and specifications.

Today, Valtor Offshore is recognized in the oil-producing world for our quality, flexibility and general knowledge. Not only proving satisfied customers, but also providing the means for an efficient service.

Valtor Offshore operates globally. We have a wide range of valves and actuators in stock, and reliable cooperation with some of the leading manufacturers worldwide.

This has manifested our position as an attractive partner to the oil and gas industry and the petrochemical sector around the globe. Valtor Offshore is indeed a supplier capable of delivering exactly what our clients need and expects, offering our clients a quick reaction time.

KNOW-HOW MAKES THE DIFFERENCE

Valves may be just a small detail in the greater context. If just a single valve fails it can be a crucial problem for the entire infrastructure.

Valtor Offshore is a specialist company providing valves, actuators and process-related equipment. We understand and meet our clients' needs as a specialist company that offers them stability and a seamless delivery – anytime, anywhere... We simply offer great results!

We supply high-quality products for all types of projects, small or large. We send our specialists out into the world to maintain and repair, both on- and offshore.

Valves, actuators, control units – combined in the right way to ensure reliability. Created by Valtor Offshore.

The Special is our Standard

Firsa is capable of satisfying the most demanding of needs. An extensive product range is available in ratings ASME 150 lbs. thru 2500 lbs. in sizes from 2" up to 40".

The consistently high level of quality associated with Firsa products is assured by strict compliance with the requirements of the Company's Quality Assurance Programme.

DOCUMENTED QUALITY IN SAFETY AND ENVIRONMENT

At Valtor, we are our own fiercest critics: We are certified to DS/EN ISO 9001:2000, and we also work according to ISO 14001:2004 and OHSAS 18001:2004. We believe that the only people really able to ensure that we continuously meet the requirements of these standards are ourselves.

We measure, monitor and inspect all our activities to ensure that we provide optimal quality aligned with the client's specifications. We take pride in delivering as ordered every time.

Most of our staff has been with us for several years. They are dedicated and committed to our clients' business. When presented with a challenge, they identify the problem and can produce a solution to satisfy all the parties involved. Their solutions are the result of their qualifications and a wealth of experience, and they draw on the know-how accumulated in Valtor Offshore and in the ERIKS group as a whole.

We are ready to meet any challenge – but always keep focus on safety and protection of the environment.

Our focus on people and the environment consequently makes Valtor Offshore the obvious partner for your project.

TOTAL PROJECT DELIVERY

At Valtor Offshore we know our clients' requirements for their process equipment.

Our experienced and competent staff possess a thorough and broad knowledge within offshore installations and ensure that we can be your partner in making your decisions.

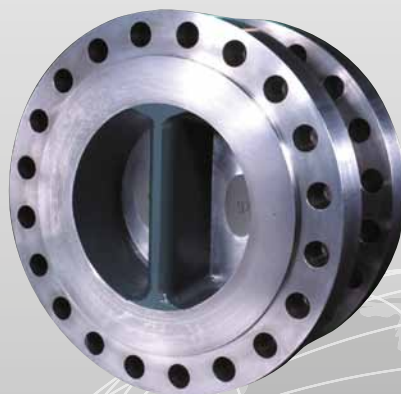

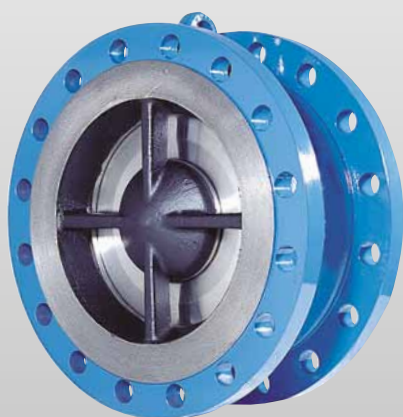

Standard solutions, special applications, individual calculations. We can be your key partner and deliver everything from idea to design, from delivery to installation and preventive maintenance. Whatever it's a single item or a total valve project, we are able to deliver the requested service whether you're looking for a single supplier or a close partnership. We say: No task is too small, no project is too big.

A TRUSTWORTHY PARTNER

Valtor Offshore is built on values like honesty, loyalty and competence. We continue to improve our relationship with our clients, by giving them more confidence, better consultancy and technical assurance, according to their needs.

We understand the crucial role our service and products play in our clients' business. Therefore we are truly and fully dedicated and committed to our customers, and you can count on us to fulfill your expectations and keep our promises – that's what we call 'the total business partnership'.

OUR VISION

We will continue to work in an honest way, and improve our relationship with our Clients, by giving them more confidence, better consultancy and technical assurance, within their needs.

OUR VALUES

RELIABILITY

- We are fully dedicated and committed to our customers. You can count on us and the products we supply.
- We give our best to deliver consistent quality services, and meet our customer demands.
- We do what we say, and we fulfill expectations and keep our promises.

RESPONSIBILITY

- We all share responsibility for our company as a whole and for its results.
- We have a social and environmental responsibility and we carefully protect the positive image of our company.
- We demonstrate individual responsibility by:
 - respecting the culture, rules and customs in the Countries in which we operate
 - Taking personal responsibility for our actions
 - Performing our work to the best of our ability

INTEGRITY

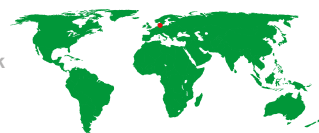

- We act trustworthy and honourable, and we always tell the truth.
- We act with the highest ethical standards.
- We ensure that the products we supply, are of the highest quality within our customers specifications

CREATING QUALITY VALVES WORLDWIDE SINCE 1958

**Our mission is - by using employees with the
very highest technical valve competences,
we will create the best dialog
to succeed designing and manufacturing
quality valves for the global oil, gas and water industri.**

RELIABLE DELIVERY

We at Valtor Offshore are aware of how important it is that our deliveries are fast and reliable. Production stops and downtimes must be reduced to an absolute minimum, and reliable delivery of replacement parts is therefore essential.

Valtor Offshore has one of the largest stocks in the EU, and we have all the necessary, recognised certificates.

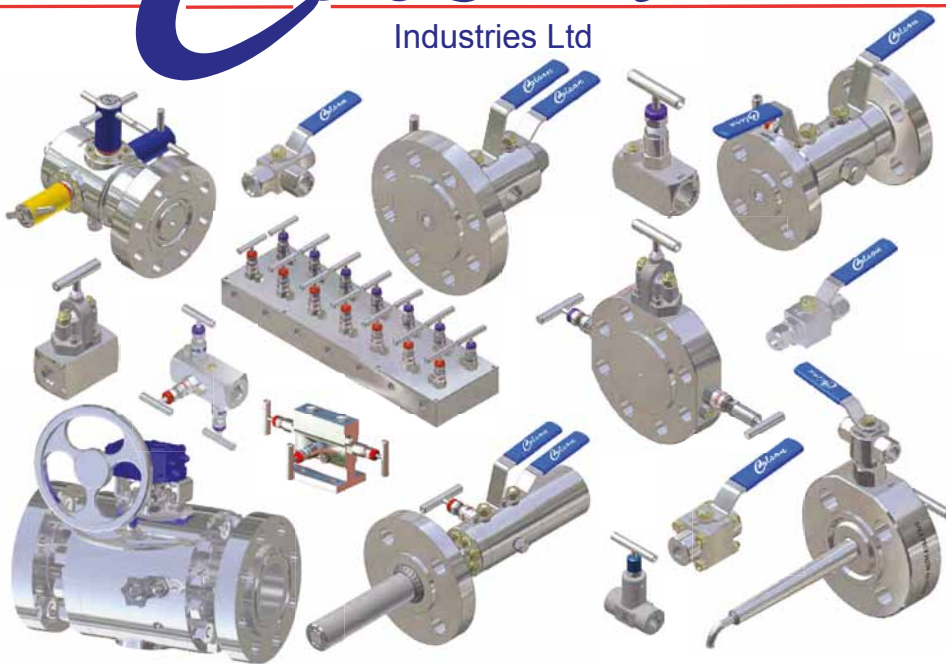

We work with well-renowned and established suppliers worldwide, with whom we have worked for years. We can draw on their stocks and thus ensure that we can fulfil any client's requirements.

THE GLOBAL SERVICE PARTNER OF THE INDUSTRY

In an industry where safety and protection of the environment are criterion not left to individual interpretation and zero-tolerance is a cool fact, stability is an integrated feature, and service is primarily a question of preventing down-time.

Valtor performs on-site service and maintenance or planned repair in our own workshops. We send our staff around the world to projects both onshore and off-shore to our clients satisfaction.

High technical quality, delivery on time, and fixed prices. Complete test facilities, flushing, leakage tracing, sand blasting, and painting. At Valtor we follow our products to the door - even if we are talking custom build solutions.

API 6A & API 6D Trunnion-mounted ball valves

- Bolted body side-entry • Welded body
- Top-entry • Double block & bleed

DAFRAM Quality System is covered by the following certificates:

- ISO 9001:2000 by RINA, cert. N. 4/89
- API Spec. Q1

DAFRAM design and production processes are covered by the following certificates:

- API 6D, License N. 0265
- PED 97/23/EC by Bureau Veritas, cert. N. CE-PED-HDAF001-01-ITA
- TRD 100 / HP 0 by TÜV, cert. N. 112309
- TA-Luft by TÜV, cert. N. 922-960157
- DIRECTIVE 94/9/EC (ATEX)
- SIL3 for functional safety

DAFRAM valves are pressure tested according to:

- API 6D - API 598 - BS 6755 Part 1 - EN 12266-1
- and Fire Safe tested and certified according to:
- API 607 5th Edition - BS 6755 Part 2 - ISO 10497 - API 6FA

DAFRAM S.p.A. is member of the Italian Valve Association
AVR and qualified to its standard Q AVR rules

Some valve actuators fit well enough in your tight piping runs.

But do they have enough torque to close your critical valves?

You might have to choose between muscle or footprint with other actuator manufacturers, but you don't need to sacrifice anything with Emerson's Bettis™ pneumatic scotch-yoke actuators. Our G-Series has a very efficient modular lightweight construction with an optimal center of gravity for applications where weight and space are important. For the same torque output requirement, Bettis G-Series is typically 1/3 lighter and smaller than our competitors' offerings. In addition, we understand accurate torque output is critical for SIL or fail-safe operations. Our G-Series has guaranteed torque outputs in spring-return models to 3 million lb-in and double-acting configurations to 6 million lb-in. PED97/23/EC, IP66 and IP67M compliance allows Bettis actuators to be used in just about any service – onshore and offshore. Learn more about compact, yet powerful, Bettis pneumatics. Contact us at www.emersonprocess.com/bettis.
